

[Speaker, Session 04]

Personal Information	
Name	WonSook Lee
Affiliation	University of Ottawa, Canada
Department	Electrical Engineering and Computer Science
Position	Full Professor

WonSook LEE is a Full Professor at EECS, Faculty of Engineering, University of Ottawa, Canada. She majored Mathematics for her BSc and MSc at the Pohang Univeresity of Science and Technology in South Korea (one semester in the Birmingham University in UK selected as an exchange student) and then switched to Computer Science when she spent two years in the Institute of Systems Science in the National University of Singapore. She was involved in CieMed group, which is basically medical imaging virtual reality research in collaboration with Johns Hopkins University. Then she moved to Geneva, Swizerland to do her PhD in MIRALab at the University of Geneva where her topic became Computer Graphics focusing on Virtual Human Modeling for Animation having various Virtual Reality applications. After that, she has continued working on computer modeling and animation, face recognition, haptic, computer games, medical imaging and application, Virtual reality applications in various areas and etc. Through the years in the University of Ottawa, she has awarded several research grants such as NSERC DISCOVERY, NSERC RTI, CFI, ORF, ORNEC, CIHR/NSERC CHRP, NSERC Engage, SME4SME, NCE GRAND and Global Frontier R&D program by the National Research Foundation of Korea. Most of grants, she is the Principal Investigator. Before coming to Canada, she also worked in several industries such as Korea Telecom and Samsung Advanced Institute of Technology in South Korea and Eyematic Interfaces, Inc in U.S.A.
